

Substantial change in scope of practice - Plan for professional development - template

1 December 2019

This document can be used by registered health practitioners to provide information to the Board about their plan for professional development when they are making a substantial change to a different scope of practice.

This template should be ready in conjunction with the [Recency of practice registration standard](#) and [FAQ](#).

Name of practitioner		
Registration number		
Previous role/position	Previous nature/scope of practice in your previous position

1. Learning needs analysis

You should consider the knowledge and skills that are required for the proposed role/position you will be working in. Comparing these to your the knowledge and skills required in your current role/position will help you to determine any gaps in your knowledge and skills. You should also consider how long it is since you last used your knowledge and skills when considering what you need to do to ensure that you are safe and competent to practice. You should then develop a program to address your learning needs.

Note: attach a separate sheet if the t space below is insufficient.

Learning needs List any gaps in knowledge and skills	How you will address these learning needs List professional development, training/programs	Proposed outcome List goals and expected outcomes	Timeframe List a completion date
